To select a mode:

Press the RF button 'X' amount of times to the relative mode. The LED will flash Green depending on which mode you have selected (how many presses).

For example to select mode 3:
Press the RF Button 3 times - The LED will flash Green 3 times, indicating you have selected mode 3.

To pause rapid fire:

Press the RF button once and the LED will turn Red, indicating you are now in pause - the controller works as normal.

Note: the controller must be switched on and have a mode selected before pause can be activated.

To exit pause:

Press the RF button once and the Red LED will turn off, indicating you are out of pause and rapid fire is enabled again.

To reset rapid fire:

Press and hold the RF button until the LED rapidly flashes Red, release the RF button - The rapid fire kit is now switched off.

Note: to be able to reset the controller you must have the controller on, in a mode, not in pause and not in program mode.

To select last mode used:

With the controller on but rapid fire kit off - Press and hold the RF button until the LED turns Yellow, then release the RF button - The last mode used will now be loaded from memory. Indicated by the LED flashing Green.

The RF Button is the additional button on the kit which has been added to your controller.

Speed Settings	Compatible Game
Speed 1	MW3 (fastest) & MW2
Speed 2	MW3 & MW2
Speed 3	MW3
Speed 4	Black Ops & MW2
Speed 5	MW2
Speed 6	MW3 & MW2
Speed 7	MW3 & MW2
Speed 8	MW3 & MW2
Speed 9	MW3
Speed 10	MW3 & MW2 (fastest)
Speed 11	MW3 & MW2
Speed 12	MW3 & MW2
Speed 13	MW3 & MW2
Speed 14	MW3 & MW2
Speed 15	MW3 & MW2

User Programmable Modes

The first 3 modes of the rapid fire kit are user programmable. You are able to select a speed from 15 settings and assign a fire button for each of the 3 modes. The speeds settings are shown in the table. You are able to select R1, R2, L1 or L2 as the firing button. When you first power up the kit/controller the first 3 modes are empty.

Programming a Mode

Select mode 1, 2 or 3 and enter pause. (turn over to see how to do this)

To enter program mode do the following:

While in pause, hold down the UP button on the D-Pad of the controller, press the RF button once and release the UP button. The LED will flash Red & Green, indicating you are now in program mode.

To select a button do the following while in program mode:

Press either R1, R2, L1 or L2 the LED will flash green indicating you have selected a button.

To select a speed setting do the following while in program mode:

Navigate the 15 speed settings by pressing the UP and Down buttons on the controllers D-PAD each press of the UP button increases the counter by 1 and each press of the DOWN button decreases the counter by 1. The LED flashes Green each time you press either button to show it has registered the increase or decrease. (Every time you enter program mode the speed counter is reset to 0).

For example to select speed setting 5:
Press the UP button 5 times waiting for the LED to flash Green on every press. If the LED doesn't flash Green the kit hasn't registed the increase.

To exit program mode do the following:

Once you have selected your button and speed, press the RF button and you will be back in pause.

If you are having difficulties with programming a button and speed you can view a video here:

Game	Auto-Aim Work?	Online Multiplayer
Modern Warfare - Campaign	YES	Will not work with online multiplayer
World at War - Campaign & Zombies	YES	Will not work with online multiplayer
Modern Warfare 2 - Campaign & Special Ops	YES	Will not work with online multiplayer
Black Ops - Campaign & Zombies	YES	Will not work with online multiplayer
Modern Warfare 3 - Campaign & Special Ops	YES	Will not work with online multiplayer

Auto-Aim Explained

Auto-Aim is a mode to be used offline for Zombies and Campaign. It is **not** compatible with online mulitplayer. The Auto-Aim modes on this kit are Mode 7 (has R1 rapid fire) and Mode 8 (no rapid fire). The table shows which games are compatible with Auto-Aim

With Auto-Aim you are able press L1 and have your sight lock onto a near by enemy. Not only will it lock on to your enemy, it will also track their movements without you having to touch the controls.

This mode is works best for zombies.

You can view a video demo of this by visiting: www.consolehouse.co.uk/demo

---

Drop Shot Explained

Drop Shot is a mode to be used online or offline on all of the games in the Call of Duty series. The Drop Shot modes on this kit are Mode 5 (R1 with rapid fire), Mode 6 (R1 with no rapid fire), Mode 11 (R2 with rapid fire) and Mode 12 (R2 with no rapid fire).

With Drop Shot you are able to press R1 or R2 depending on your mode and Circle will automatically be pressed preforming the Drop Shot maneuver for you.

---

Akimbo & Auto-Akimbo Explained

Akimbo is a mode to be used online with Akimbo/Dual wield guns on Black Ops, MW2 & MW3. The Akimbo modes on this kit are Mode 4 (R1 & L1) and Mode 10 (R2 & L2). Auto-Akimbo modes on this kit are Mode 9 (R1) and Mode 15 (R2).

With Akimbo you are able to rapid fire both weapons independently. Auto-Akimbo is the same but when R1/R2 is pressed L1/L2 is automatically pressed - shooting both weapons.
